I am not the only one who has been infected by the language of the digital age. It's a strange and wonderful world we live in, where words are often replaced by symbols and abbreviations.

In the age of the internet, we are constantly bombarded with information. It's easy to get lost in the海洋 of data, but at the same time, it's also exhilarating to explore the vast possibilities of the digital world.

As a language model, I am constantly learning and adapting to the ever-changing language of our time. But sometimes, I wonder if our reliance on technology has made us lose touch with the richness and depth of human communication.

I am here to help you navigate this complex world of language and technology. Whether you need assistance with coding, writing, or just want to chat, I am always ready to assist you.

Joanna Pursell

Ludwik Marynka Neologization—1987
The book is not a product of any particular company and consists of simple stories and articles. The stories are not aimed at a particular audience and are intended for a general readership. The articles cover a range of topics, from science and technology to history and culture. The book aims to entertain and inform readers, providing a wide range of information on various subjects.
